(54) Title: **STABILIZED ANTHOCYANIN EXTRACT FROM *GARCINIA INDICA***

(57) Abstract: A method of making a red pigmented composition is disclosed which includes (a) preparing an aqueous extract of *Garcinia indica* fruit comprising at least one red colorant; (b) treating the extract with a cation exchange resin so that one or more red colorant associates with the resin; (c) eluting the red colorant from the resin with an eluting solution containing one or more alcohol such as methanol, ethanol and isopropanol and one or more acid such as hydrochloric acid, citric acid, acetic acid, tartaric acid and hydroxy citric acid to yield a red-colored eluate; (d) collecting and concentrating the eluate to provide a concentrate; and (e) adding an antioxidant agent and/or placing the concentrate in an aseptic container in a non-oxidizing atmosphere. A combination comprising the resulting stabilized *Garcinia* extract in aseptic packaging in a non-oxidizing atmosphere is also disclosed, along with methods of use.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
